1. (Amended) A method for manufacturing a tent construction, said method comprising the steps of manufacturing a basic tent construction having at least one basic panel from a desired material, providing at least one of said basic panels with one or more covering panels of waterproof material which form part of an outer wall of the tent construction, and removably mounting one of (the ^{one or more} at least one) covering panel on the outer wall of the tent construction so that the one of the at least one covering panel is completely removable from the tent construction.

B

3. (Twice Amended) A method according to claim 1, further including the steps of forming the basic panel by a number of edge strips of durable cloth, and attaching to said edge strips one or more at least partially detachable covering panels, which together with the edge strips form at least a panel part.

4. (Twice Amended) A method according to claim 1, wherein the basic tent construction is formed from breathing material on which at least one covering panel of weather-resistant material is fitted.

5. (Amended) A method according to claim 3, wherein an opening formed by the edge strips is closed off by an open, breathing material for forming a closed basic panel, and wherein on the thus obtained basic panel at least one covering panel of weather-resistant material is fitted.

6. (Twice Amended) A method according to claim 1, wherein at least one of the basic panels is provided with covering panels arranged as roof tiles or scales.

7. (Twice Amended) A method according to claim 1, wherein one or more covering panels are arranged for folding down.

8. (Amended) A method according to claim 3, wherein from the edge strips together with tent poles form a frame for the tent construction.

9. (Twice Amended) A method according to claim 1, wherein for attaching at least one covering panel along at least one of the edges of the covering panel, detachable fastening means are used.

10. (Amended) A method according to claim 9, wherein the detachable fastening means include one of zippers and hook and loop fasteners.

B6K

11. (Twice Amended) A method according to claim 1, wherein at least one of the covering panels is provided with an expansion member to enable putting the covering panel into an outwardly open position.

12. (Twice Amended) A method according to claim 1, wherein at least one of the covering panels is provided with one or more guy ropes for stretching out the covering panel.

13. (Amended) A method for manufacturing a tent construction having at least one roof panel and at least one wall panel, comprising the steps of

making at least the roof panel of double-walled design having an outer panel and an inner panel,

providing operable closing means to enable opening or closing an interspace located between the inner panel and the outer panel, and

removably mounting the outer panel so that the outer panel is at least partially removable from the tent construction.

AS Cont

14. (Amended) A method according to claim 13, wherein the outer panel is provided with means for tautening the outer panel to increase the interspace between the outer panel and the inner panel.

Bu

15. (Amended) A method according to claim 14, wherein at a location of at least one tent pole, the outer panel is provided with at least one additional opening for receiving a tent pole to enable bringing the outer panel into a taut condition.

16. (Twice Amended) A method according to claim 13, wherein the inner panel provides a hollow appearance.

17. (Twice Amended) A method according to claim 13, wherein the outer panel is designed with detachable fastening means provided along at least two edges, for attaching the outer panel to the inner panel.

18. (Twice Amended) A method according to claim 13, wherein the outer panel is provided with edge flaps for covering the interspace between the outer panel and the inner panel.

19. (Twice Amended) A method according to claim 13,
wherein the inner panel is provided with one or more waterproof
edge strips.

21. (Amended) A tent construction comprising at least one basic panel manufactured from cloth, at least one of the basic panels being covered with one or more covering panels of waterproof material, forming part of an outer wall of the tent construction, the covering panel being removably mounted for at least partial removal from the tent construction.

23. (Twice Amended) A tent construction according to claim 21, wherein at least one basic panel comprises a number of edge strips of durable material, one or more detachable covering panels being attached to the edge strips.

24. (Amended) A tent construction according to claim 23, wherein an opening of the at least one basic panel is closed off by a material permeable to at least one of air and light for forming a closed basic panel.

25. (Twice Amended) A tent construction according to claim 23, wherein the edge strips of a number of basic panels,

together with associated tent poles, form at least a part of a frame for the tent construction.

AS Conf

26. (Twice Amended) A tent construction according to claim 21, wherein the basic tent construction is at least partially built up from breathing cloth, on which a suitable number of panels from weather-resistant material are provided, said number of panels comprising one or more detachable panels.

AS Conf

27. (Twice Amended) A tent construction according to claim 21, wherein the detachable panels comprise at least a roof panel.

28. (Amended) A tent construction according to claim 27, wherein a gap-shaped space can be opened or closed between an outer roof panel and an inner roof panel.

29. (Amended) A tent construction according to claim 28, wherein the inner roof panel is provided with waterproof edge strips.

30. (Twice Amended) A tent construction according to claim 28, wherein the outer roof panel is provided with an edge flap for covering an entrance to the gap-shaped space.

*AS

31. (Twice Amended) A tent construction according to claim 27, further comprising tensioning means for tensioning the roof panel.

*AS
B6*

32. (Amended) A tent construction according to claim 31, wherein the tensioning means comprise a number of receiving openings for a tent pole, provided side by side in the roof panel.

33. (Amended) A tent construction according to claim 27, wherein an inner roof panel is located under a partially detachable outer roof panel and provides a hollow appearance.

B10

35. (Twice Amended) A tent construction according to claim 21, wherein at least a number of covering panels have expanders for stretching out.

B

36. (Twice Amended) A tent construction according to claim 21, wherein at least one of the covering panels is of double-layered design such that between the layers of the covering panel, a layer of insulating material is provided.

37. (Twice Amended) A tent construction according to claim 21, wherein under at least a number of covering panels, a layer of insulating material has been provided.
